

WHAT NEXT. We have a system we pay to have in our cars and trucks to keep informed on SAFETY issues in the cities we are going to be in or going to and it sure helps for safety and now someone wants to stop that. i go into several cities but for a example Chicago IL. if you live there you know the Eisenhower from the Kennedy and or the Stephenson. But if you don't live there you have NO idea what is what.and the mile long bridge and or the Boreman ??? well on my XM radio i know what is what now as I-55 is the Stephenson as they state both in there report and were and when a sports game is and when it will affect traffic. WGN 720 radio refused to change there traffic report and others are for one team or the other so you never know. Dam you go through St. Louis on I-70 or I-55 And the Cardinals have just ended a game and traffic is hell. we could wait a hour with a truck with 20 tuns of load so not to have to make those quick stops that KILL people. LEAVE US ALONE We can't have a radar that some states have a safety system built into to tell us about problems ahead WHAT NEXT BIG MONEY WANTS TO HURT US
